E-Franchise Model: Client Rough Draft

Draft Date: 16 Feb 2026

1) Vision

- Build an integrated B2B franchise commerce platform connecting Admin, Franchisee, Outlet POS, Delivery Guard
- Start with web-first operations and configurable controls; later release Android APK and iOS apps on the same ba

2) Core Modules

- Admin: onboarding, product catalog, commissions, special deals, delivery rules, user/role controls.
- Franchisee: place order, choose instant/day delivery, choose pickup/delivery mode, track bill/docket status.
- Outlet POS: multiple POS users per outlet, floor scan-and-bill, create docket (single or multi-bill), handover to gua
- Delivery Guard: custody management, weight capture, tolerance alert, verified handover to franchise or delivery m
- Delivery Man: pickup from guard, navigation, proof-of-delivery.

3) Financial Logic

- Franchise advance received by admin; 75% credited into franchise wallet.
- Order execution allowed only when payable value is less than or equal to wallet balance.
- Commission configurable at department or product level; product-level rule overrides department-level.
- Payable to outlet = bill value minus commission.

4) Dispatch and Docket Logic

- Single bill can move directly by bill number or optional single-bill docket.
- Multiple bills for one franchise are packed individually and grouped into one docket.
- Docket number is mapped to franchise and visible in franchise app along with all bill numbers.
- POS can handover all bills or selected bills; guard captures weight at bill/docket level.
- If measured weight exceeds tolerance, system alerts for quantity/item recheck before dispatch.
- Final handover may be to franchise pickup or via delivery man based on franchise selection.

5) Client Benefits

- Full traceability of custody from POS to final recipient.
- Reduced dispatch errors through docket mapping and handover confirmation.
- Commercial flexibility via admin-configurable commissions, deals, and delivery pricing.
- Scalable architecture ready for mobile launch in next phase.

6) Proposed Phasing

- Phase 1: Admin + Wallet + Order + POS + Guard + Docket + Delivery operations.
- Phase 1: includes manual weight-entry validation with tolerance alerts at guard desk.
- Phase 2: payment gateway, UPI top-up, GST workflows, geofencing, weighing machine and counting machine int
